PENTHOUSE SYSTEM - FREEZING TUNNEL

CUSTOMER: MAJOR BAKERY

INSTALLATION LOCATION: MIDWESTERN U.S.

APPLICATION: CROISSANT FREEZING TUNNEL

PROBLEM: Customer required a refrigeration system that would maximize production output without defrost downtime, maintain uniform high quality products and use no valuable production floor space during installation and operation.

SOLUTION: Customer installed a Penthouse “No-Frost”® refrigeration system which provided continuous 24/7 operation. This increased production throughput/output, reduced energy usage and equipment required no use of production space.

ADVANTAGES

- Continuous frost-free cooling without defrost
- Consistent tunnel temperature
- Uniform product quality
- Continuous sanitized coil operation
- Low energy use
- Continuous product throughput/output
- Low maintenance requirements
- No equipment in production space

**FOR MORE INFORMATION ABOUT THIS AS WELL AS OTHER “NO-FROST” APPLICATIONS,
PLEASE CONTACT THE NIAGARA FACTORY OFFICE IN BUFFALO, NY.**
