

NIAGARA BLOWER COMPANY

No-FROST® REFRIGERATION SYSTEMS

New Spray Retrofits for Niagara Conditioners

The *new* Niagara spray arrangement system features large diameter nozzles virtually eliminating the potential for obstructions.

The system also provides better spray coverage using fewer spray nozzles. This arrangement reduces energy consumption and maintenance requirements.

The new spray arrangements are easily retrofitted to the existing spray header boxes in the Niagara conditioners. No changes to the spray pump or spray piping are required.

ADVANTAGES

- Fewer spray nozzles
- Increased spray coverage
- Reduced energy consumption
- Reduced maintenance requirements
- Inexpensive retrofit
- Reduced orifice obstruction

For more information about this as well as other No-Frost® system upgrades, please contact the Niagara factory offices in Buffalo, NY.
